

## Product overview

The TraffiPipe<sup>®</sup> T16 is a unique patented product boasting of two key features.

Patented for its colored layers through the pipe symbolizing a traffic light. This provides a visual quality management system to manage any damage to the oxygen barrier of a pipe should it become damaged. A punctured oxygen barrier is the number one reason for water becoming brown and sludgy in heating systems, leading to system inefficiency and product failure

The T16 is unique for its flexibility, its been tested to show that its the most flexible UFH pipe in its class. The base material is compositite PE-RT.

## Key features

- LifeTime warranty
- Most flexible UFH pipe
- PATENTED visual quality management system
- Coil sizes, 120, 240 and 500m
- Two way meter marking on pipe
- WrapToSave pipe system, leading to 5-10% savings on pipe usage

## Product warranty

TraffiPipe<sup>®</sup> T16 carries a LifeTime warranty and is compatible with the SlimPul<sup>®</sup> fitting.

The TraffiPipe<sup>®</sup> is expected to be pressure tested to double the normal working pressure of the system and left under pressure for 30mins.

The SlimPul<sup>®</sup> pipe fittings should be used to maintain the lifetime warranty of the pipe.

**Red** = Stop!.....replace or repair. You have gone through the oxygen barrier in the pipe.

**White** = Assess.....first layer of green has been removed, however you are still safe to proceed as the structural integrity of the pipe is intact.

**Green** = Go....safe to proceed.
