

EFFICIENT, DURABLE, AND EASY-TO-USE FOR REPAIRS

This pipe fitting toolkit is an essential tool for UFH installers, designed to connect SlimPul[®] fittings and UFH pipes efficiently and reliably, making it the preferred option for professionals. The toolkit comes with 12mm and 16mm jaw sizes, providing flexibility for various installation needs.

Stroke Length

An 80mm stroke for efficient crimping

Durable

Extremely strong and resistant to corrosion

Lifetime warranty

Providing peace of mind on your pipe repairs

Optimised flow

9% larger internal bore, reducing flow restriction

No rubber seals

Longer-lasting, leak-proof performance

more than underfloor

SLIMPUL[®] PIPE REPAIR & EXTENSION TOOL

INFORMATION SHEET

SLIM, SLIMMER, SLIMPUL[®]

12mm Sleeves 42070
12mm Coupling 42074
Tool kit 44200

16mm Sleeves 42071
16mm Coupling 42075

RED - do not repair on a bend

GREEN - only repair on a straight

PIPE EXTENSIONS: SLIMPUL[®] SAVES TIME, MONEY, AND MATERIALS

SlimPul[®] fittings are not just for repairs, they allow you to join pipe lengths together, making them a cost-effective solution that reduces material wastage. And with a Lifetime Warranty, SlimPul[®] ensures you never have to compromise on quality or durability, even when repurposing surplus pipe.

THE PROBLEM WITH TRADITIONAL PIPE REPAIRS

Bulky fittings

30mm diameter, requiring bigger cuts in the floor

Corrosion

Brass fittings are prone to corrosion reducing reliability

Not long-term

Installers left unprotected if something goes wrong

Flow restriction

Traditional fittings reduce the internal bore

Deterioration

Degrade over time, leading to leaks and repairs
