Slip stop feature - to enable fast alignment over the manifold connector

M30 size – for Ambiente manifold connectors

Open-fronted spanner – for fast connection while the pipe is connected

Swan neck design – giving clearance to drop below the other manifold connector

Tether point – for tool tethering

Product overview

The SpeedSpanner30 is a unique tool which has been designed to speed up the process of connecting pipes to a manifold. Designed to work with all the Ambiente manifold connectors, this tool is a professional's essential part of their tool box.

The swan neck design is to allow even more turn per connector in one swift action, along with the slip stop feature meaning you can slide the SpeedSpanner30 up the pipe and connect into position at pace.

Claims

- Seven times faster than traditional methods
- Lifetime warranty
- Tool tetherable – promotes site safety where the tool can be tethered to your work belt
